# YOUR CUSTOMERS WANT QUICK SHADE:

## Sell 'em the Siberian or Chinese Elm

*Ulmus Pumila*, hardy North China strain

THE HARDY, FAST-GROWING, DROUGHT- AND DISEASE-RESISTANT ELM INTRODUCED AND RECOMMENDED BY THE U. S. DEPT. OF AGRICULTURE. NOTE THE REMARKABLE GROWTH ON THE TREES BELOW, THOUGH GROWN IN WIDELY SEPARATED DISTRICTS.

We have distributed thousands of these trees in the West, the Central States, and on the Atlantic Coast from the Carolinas to New England inclusive.

They are thriving in all these points on well drained soil. They do not enjoy wet feet, though they stand more of that than should be asked of them.

*Siberian Elm, Toppenish, Wash.,  
only 3 years old*

*Siberian Elm, Philadelphia, Pa.; 18 years from seed.  
Forty-foot spread, 35-foot height, 62-inch circumference.*

This tree is beautiful as well as fast-growing, the first to leaf out in the spring and the last to shed in the fall. The demand is here. Be prepared with our well rooted, straight stemmed, thoroughly matured and well graded trees.

Typical Elm leaf but much smaller than American Elm leaves. Wood hard as flint; beautiful grain. Tree graceful in any form and very adaptable to shaping as desired. Excellent for lawn, parking strips, landscaping, highway or roadside planting.

For reforesting our waste lands from coast to coast, unsurpassed.
